SPECIAL BOARD MEETING

**Location: Robert Union Farm Center
4925 Howard Rd, Stockton, CA 95206
THURSDAY, APRIL 24, 2025, 8:15 A.M. – 12:00 P.M.**

A majority of the SJAFCA Board will be visiting the Paradise Cut Bypass Expansion and Multi-Benefit Project sites and therefore the Agency has agendized this as a Special Board meeting.

Once the meeting is called to order at the Robert Union Farm Center it will then move from place to place. Members of the public may participate in the remainder of the site visit but must provide their own transportation from place to place. The Board will not discuss Agency business during any periods in which it is separated from the public. The Agency can not provide a schedule for each of the stops; if the public is interested in attending the entire tour it must follow the agency transport to ensure it can observe the entire meeting.

1. CALL TO ORDER / ROLL CALL
2. INFORMATIONAL BRIEFING AT THE ROBERT UNION FARM CENTER AND VARIOUS OTHER LOCATIONS
3. ADJOURNMENT

In compliance with the Americans with Disabilities Act, the initial meeting location is wheelchair accessible and disabled parking is available. However, certain stops along this tour are not wheelchair accessible. If you have a disability and need disability-related modifications or accommodations to participate in this meeting, please contact the Board's office at (209) 299-4200. Requests must be made one full business day before the start of the meeting.

Paradise Cut Bypass Expansion and Multi-Benefit Project

Site Visit
April 24th, 2025
8:15am – 12:00pm

Meet at:
Robert Union Farm Center
4925 Howard Rd, Stockton, CA 95206

The Paradise Cut Bypass Expansion and Multi-Benefit Project will improve flood protection for local communities, restore habitat, and improve water supply reliability in the South Delta. The Project will expand the existing Paradise Cut Bypass, restore capacity in South Delta channels, and increase habitat for species of state and local importance.

Project Goals

- Increase flood system resiliency in the South Delta.
- Restore habitat and ecosystem functions necessary for climate change resilience.
- Improve water supply reliability and resilience to climate change by supporting more flexible water supply management.

SAN JOAQUIN
FLOOD CONTROL A

Study Alternatives

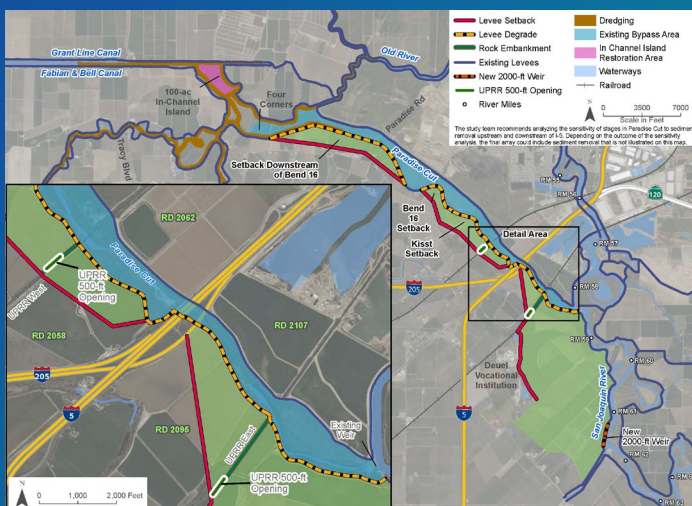

Minimum Plan B (Alternative 2) + Modifications

- Extends the existing Paradise Cut weir downstream
- Setback levees on the right bank of Paradise Cut
- Setback levees on the left bank (in RD 2095 downstream of the east UPRR crossing)
- Setback levees at Kisst Dairy and Bend 16
- New floodway areas would be restored to create habitat for target terrestrial species.

Phase 2 Plan (Alternative 3) + Modifications

- New 1,000-ft long upstream of Paradise Cut
- 500-ft opening in the east UPRR crossing
- Levees setback from Deuel Vocational Institution to the east UPRR crossing, and from the east UPRR crossing to just beyond the west UPRR crossing.
- Setback levees at Kisst Dairy and Bend 16
- New floodway areas would be restored to create habitat for target terrestrial species.

Phase 2 Plan Plus (Alternative 6) + Modifications

- New 2,000-ft long upstream of Paradise Cut
- 500-ft opening in the east and west UPRR crossings
- Levees setback from Deuel Vocational Institution to the east UPRR crossing, and from the east UPRR crossing to just beyond the west UPRR crossing
- Degrade levee on left back of Paradise Cut between existing weir and UPRR east crossing
- Setback levees at Kisst Dairy and Bend 16
- Setback levees downstream of Bend 16
- Restore Slamon Slough (pink on map)
- New floodway areas would be restored to create habitat for target terrestrial species

Common to all Preliminary Alternatives

All preliminary alternatives contain:

- 39 miles of dredging included in all preliminary alternatives:
 - Downstream portion of Paradise Cut, Tom Paine Slough, Middle River, Western reach of Old River, Eastern reach of Grant Line Canal, Four Corners area
- Restoration opportunities at 12 sites on the San Joaquin River
