8. EXECUTIVE DIRECTOR REPORT 2:53 PM

- a. On May 21 there was a Design Charrette for the construction of a new similar gate structure to the new Smith Canal gate structure. Chair Blower attended and greeted the team from the U.S. Army Corps of Engineers, design consultants, and various Reclamation Districts. The Army Corps are currently comparing different gate designs and addressing local concerns.
- b. The first meeting was held with the ASA for Section 203 authorization. We shared with them some key policy areas that we know will be a concern; the EO11988, which is the wise use of floodplains, and Section 221, which will allow us to get reimbursed from this project when the project is authorized by the federal government.
- c. TS30L is well under construction. The levee has been degraded, and the slurry wall will be poured on the 21st or 22nd of June. We are on track for completion at the end of this year.
